

Leapgen.ai

Pioneering Artificial Intelligence Solutions
for Tomorrow's Challenges

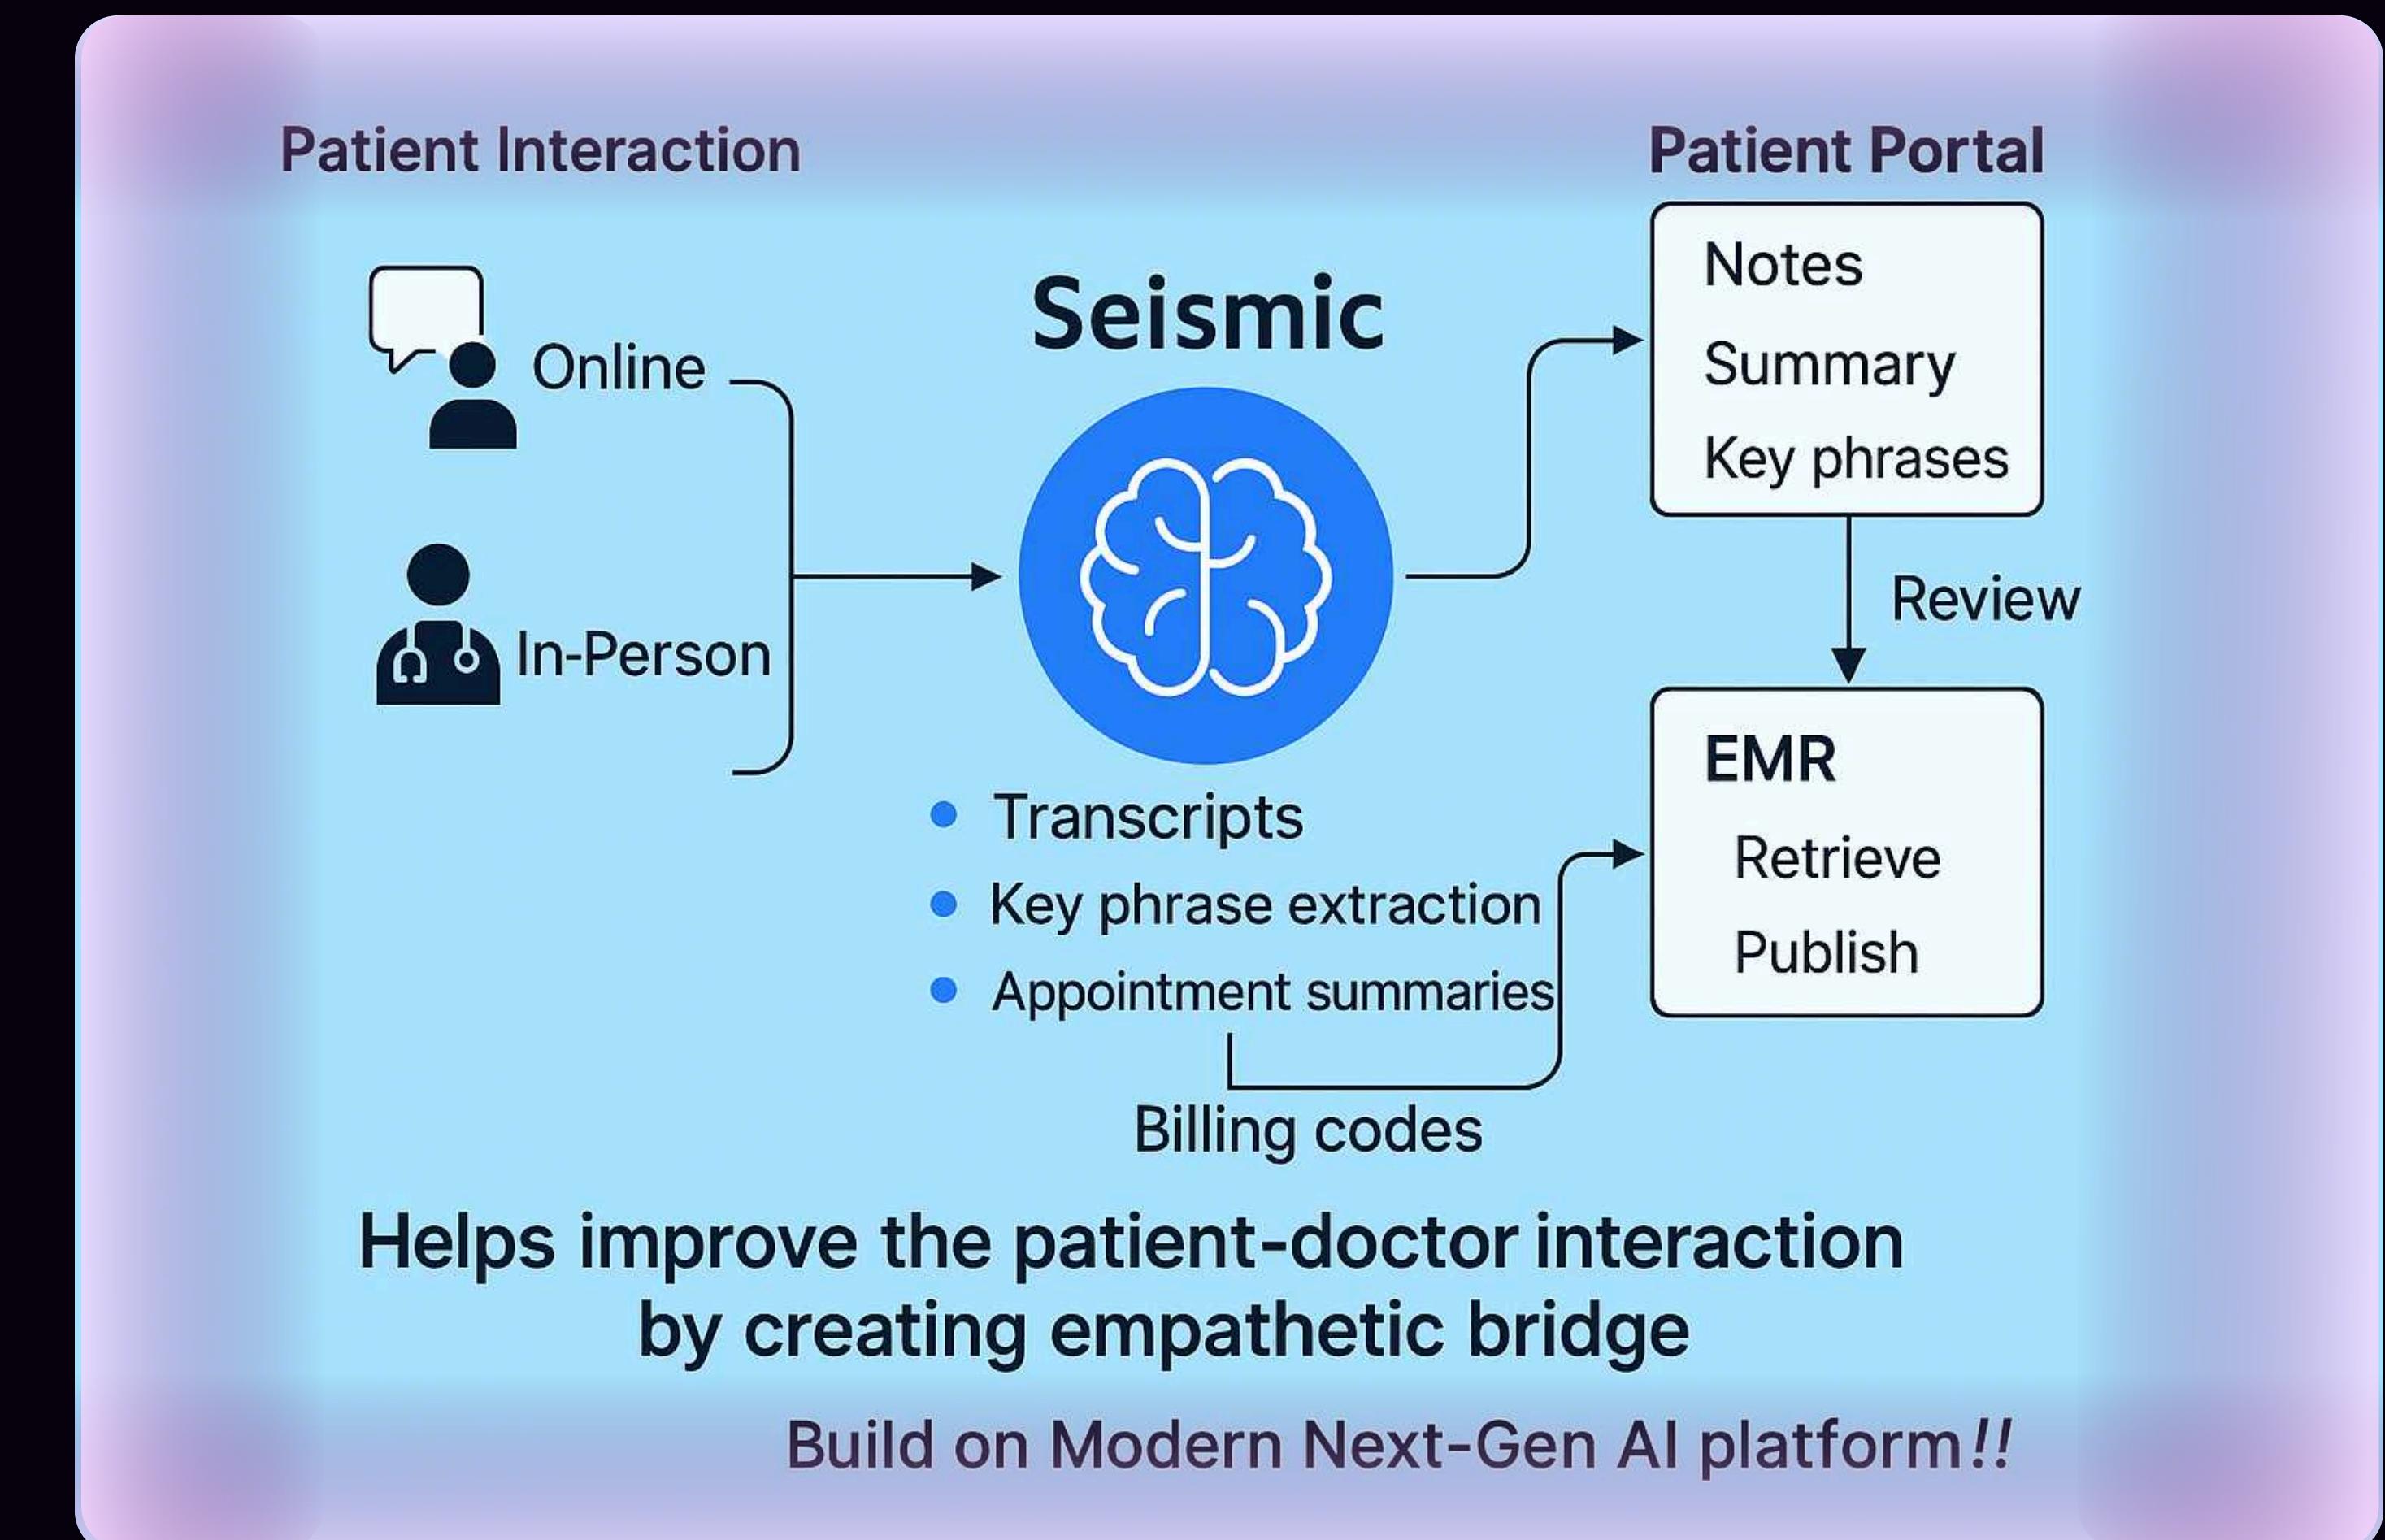

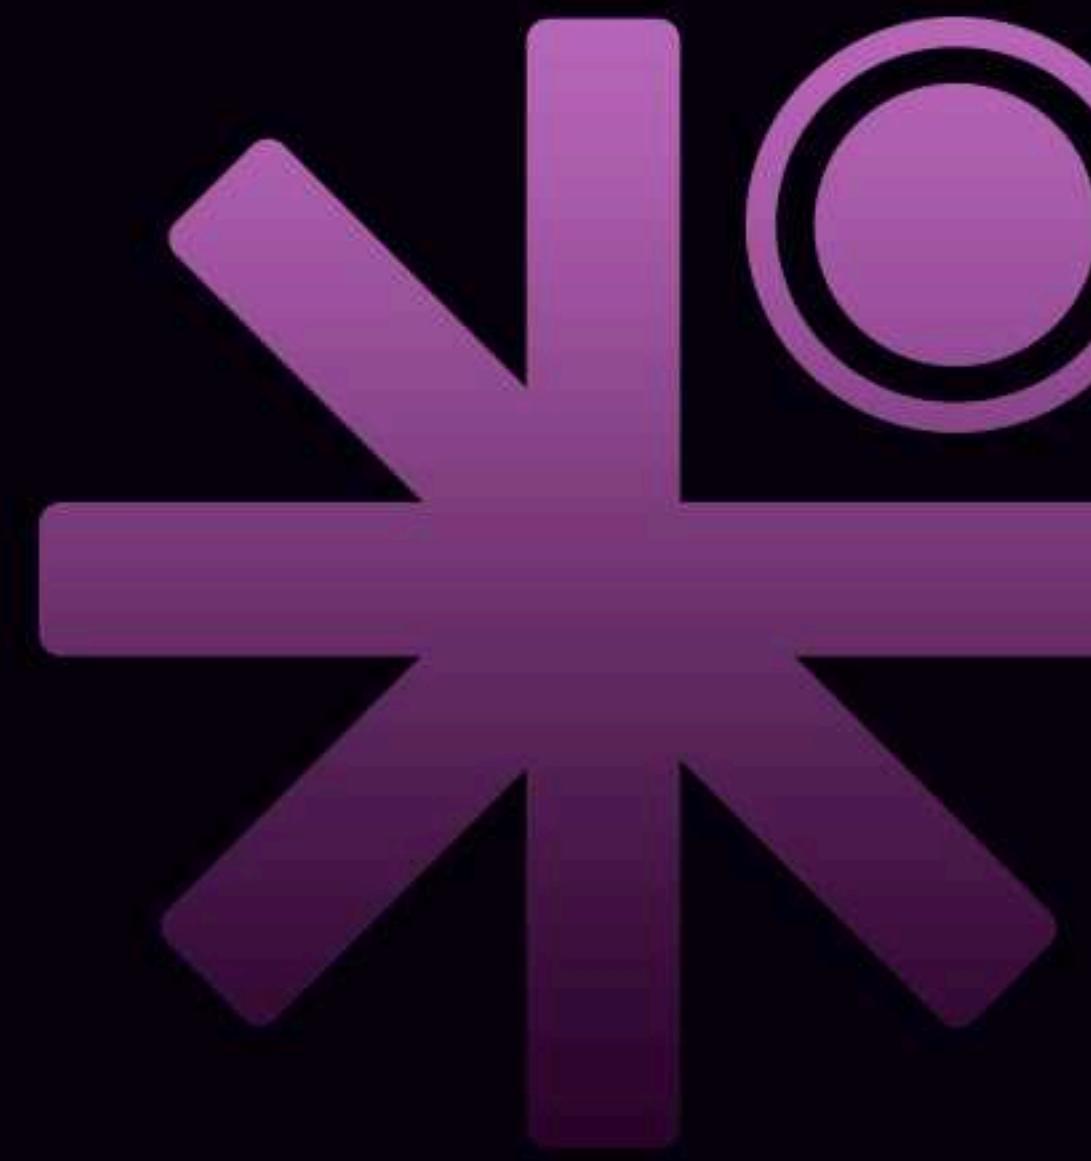

Product Overview

Seismic is a next-generation AI solution designed to revolutionize healthcare documentation. It tackles the growing administrative burden on clinicians by automating real-time note-taking during patient interactions. Using generative AI, Seismic transcribes and structures conversations instantly, eliminating the need for manual documentation and freeing up valuable clinician time.

What sets Seismic apart is its integration of Emotional Intelligence (EQ) tracking. By interpreting tone, sentiment, and verbal cues, Seismic provides clinicians with actionable insights to enhance empathy, personalize care, and deepen patient-clinician relationships.

Seismic - Product Flow Diagram

Core Value Proposition

Seismic offers healthcare providers an innovative tool that:

- **Enhances Documentation Efficiency:** Real-time, AI-powered note-taking eliminates manual effort, allowing clinicians to focus more on patient care.
- **Improves Patient-Clinician Relationships:** EQ tracking gives visibility into patient emotions, enabling a more empathetic approach.
- **Optimizes Follow-Up Preparation:** Generates context-based insights that support continuity of care and more effective follow-ups.
- **Boosts Operational Efficiency:** Streamlines workflows and reduces administrative costs by automating routine documentation.
- **Supports Better Clinical Outcomes:** Delivers more accurate documentation and emotionally aware care strategies for improved patient results.

Target Market & Use Cases

1. Primary Care Physicians

- **Pain Points:** Burdened by high documentation volume and limited time for patient interaction.
- **Seismic's Solution:** Reduces note-taking load, enhances emotional insights for deeper engagement, and improves care quality.

2. Specialists

- **Pain Points:** Managing complex patient data while maintaining personal interaction quality.
- **Seismic's Solution:** Streamlines documentation with real-time AI capture and delivers emotional cues for context-aware care.

3. Healthcare Organizations

- **Pain Points:** Need to improve patient satisfaction while reducing clinician burnout and cost.
- **Seismic's Solution:** Increases operational efficiency, optimizes cross-departmental workflows, and enhances care delivery.

Key Features & Differentiators

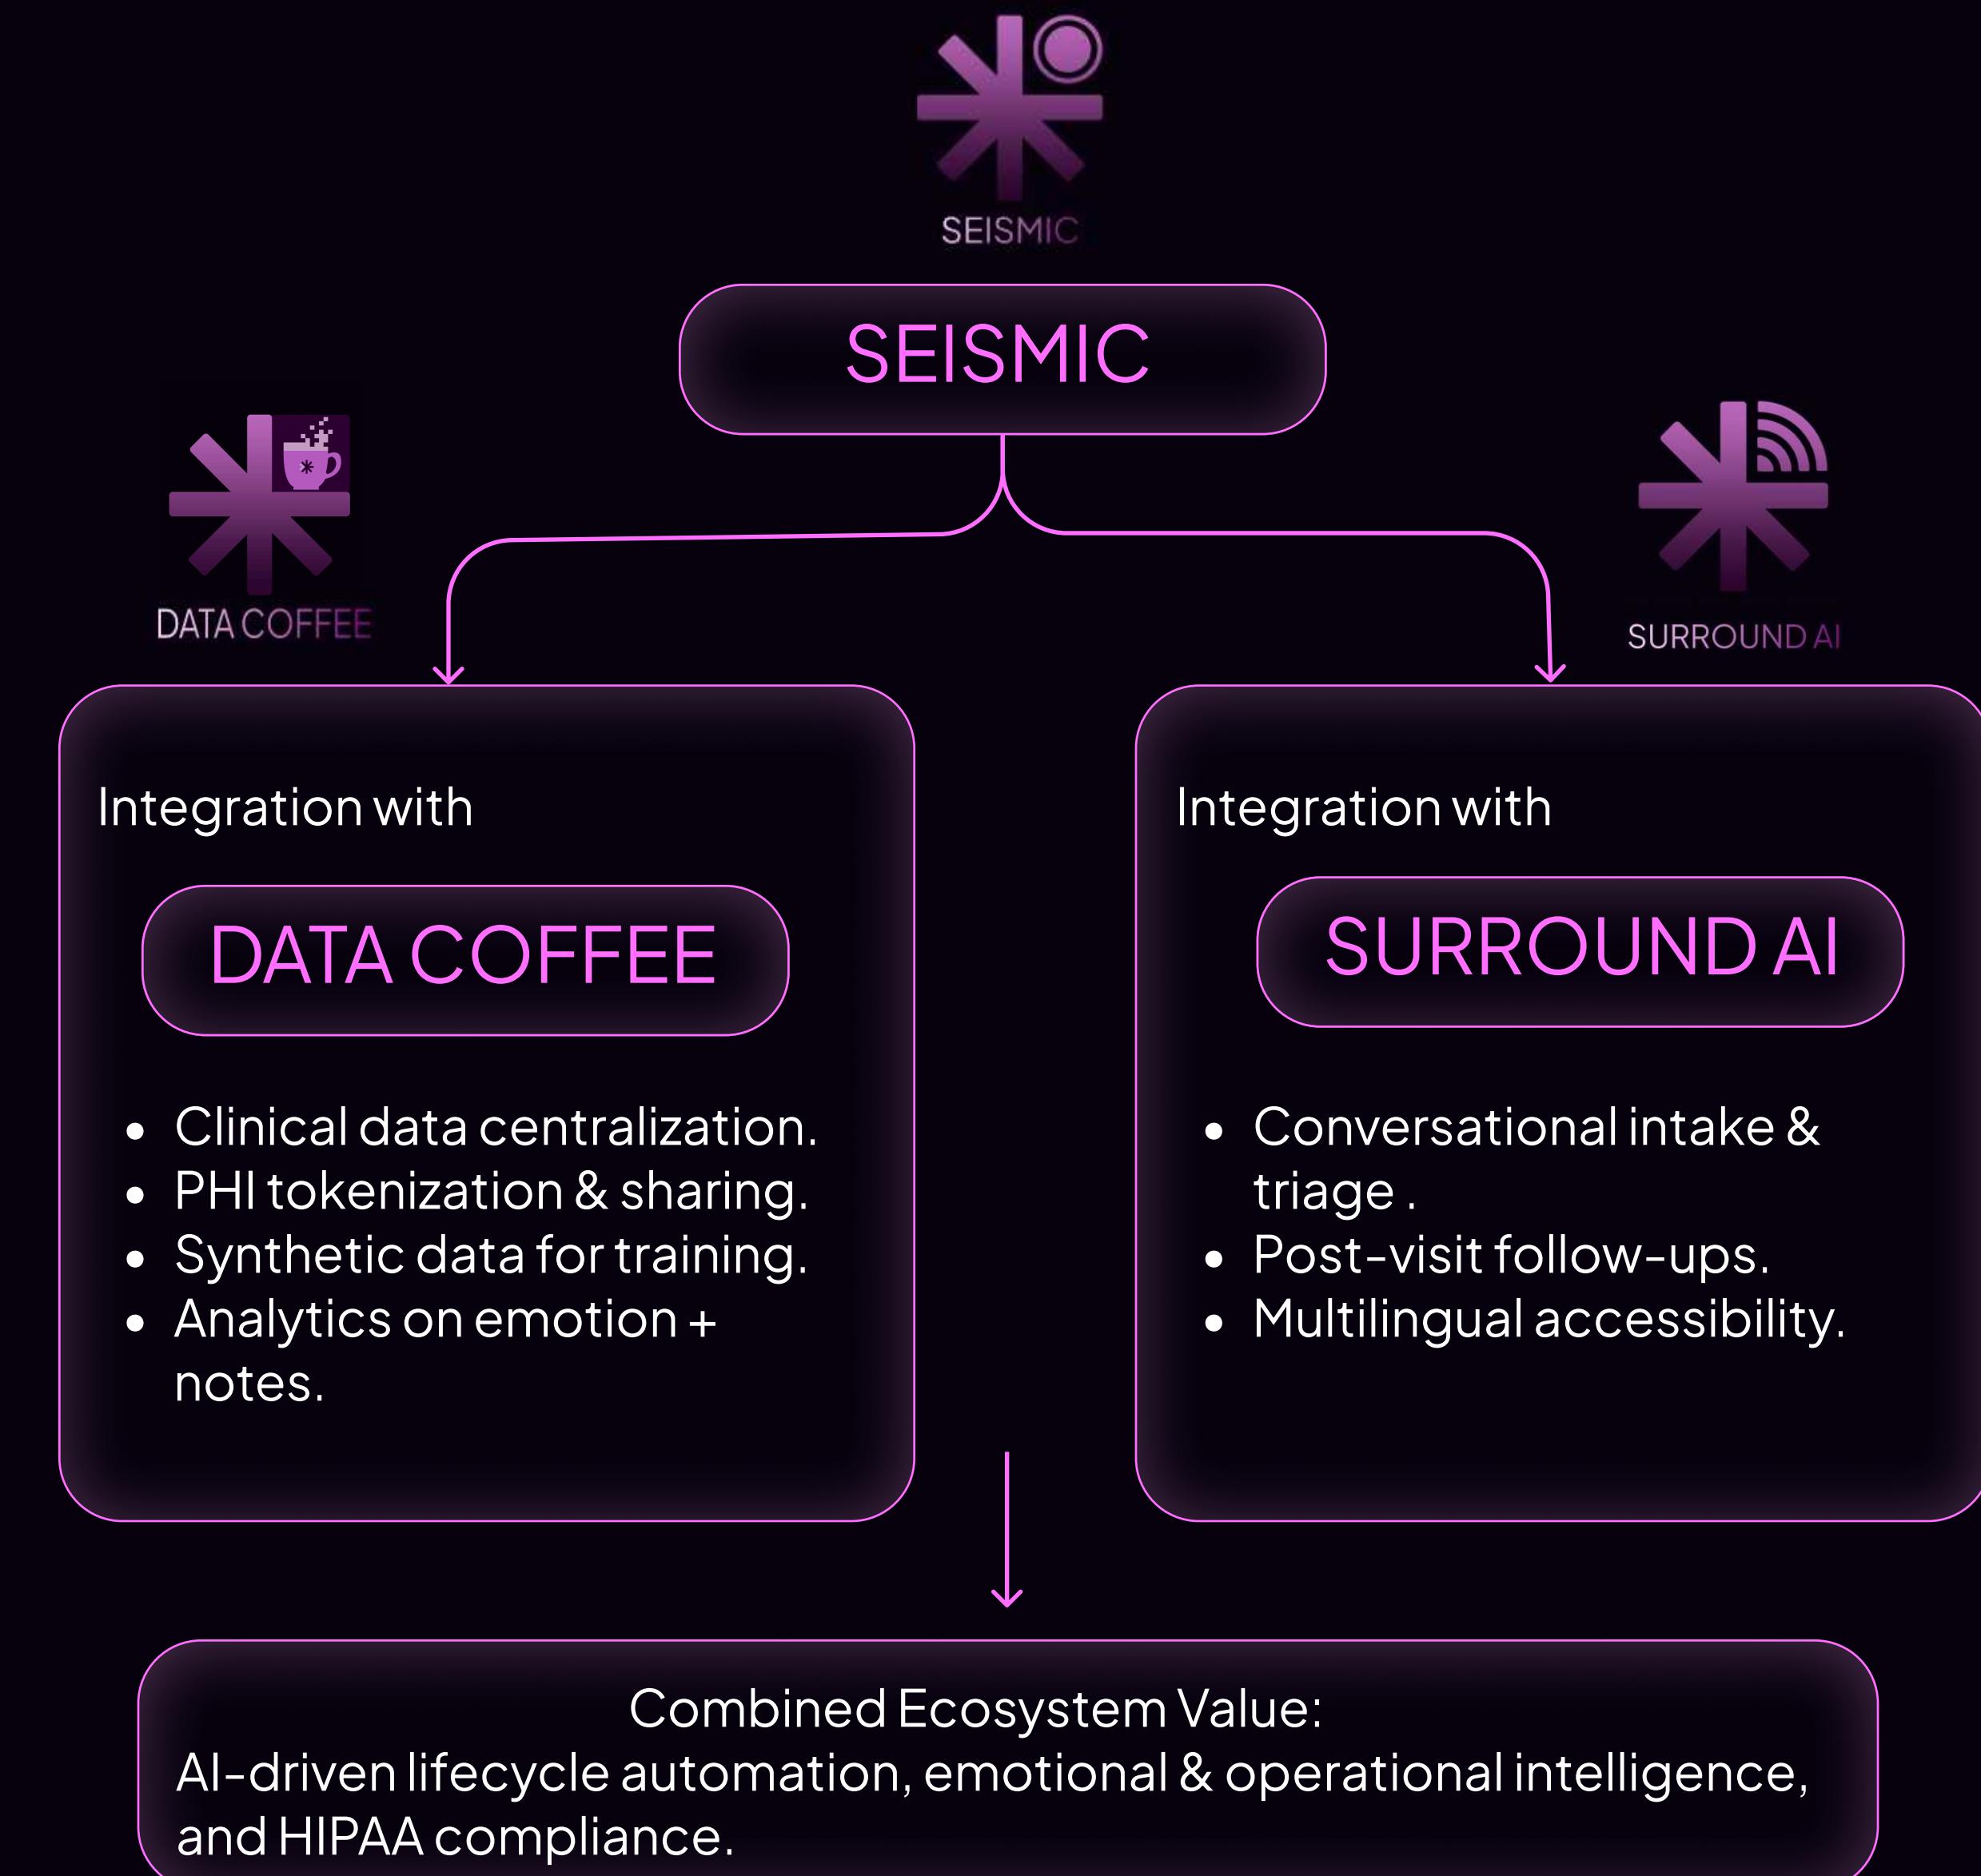

- **Real-Time Documentation:** Captures and structures patient conversations on the fly, dramatically reducing time spent on EHRs.
- **Emotional Intelligence Tracking:** Detects tone, sentiment, and verbal nuances to help clinicians adjust their communication style.
- **AI-Powered Follow-Up:** Offers smart recommendations and highlights from previous visits to aid preparation for future interactions.
- **Clinician-Centric UX:** Designed to minimize disruption and integrate seamlessly into clinical workflows.

Combined Ecosystem Value

When used with Surround AI and Data Coffee, Seismic becomes part of an integrated AI-powered healthcare solution that ensures compliance while enabling lifecycle automation and intelligence across patient care.

- Automates the full patient lifecycle.
- Enhances emotional and operational intelligence.
- Maintains HIPAA compliance while improving efficiency.
- Integrates structured data for end-to-end workflow automation.
